AAL-SERIES INCLINOMETER

SPECIFICATIONS

Dual axis inclinometer

Measurement range

± 2 to $\pm 30^\circ$

Analog output signal

The **AAL-Series** conductive inclination sensor offers a full calibrated inclination sensor module on a PCB. The sensor provides voltage output depending on the inclination angle and related to the specific axis, as well as a voltage based temperature output signal. An optional integrated e2-prom contains data on the characteristic curve resp. calibration data. This allows for a high integration into a specific application with excellent performance regarding accuracy and long-term stability.
