

# ■ Welding Consumables Handbook

## EWM Welding consumables - The logical consequence

The whole world of welding technology from one single supply source:

- One point of contact for all system components
- Accelerated availability and delivery times
- The responsibility for the complete process chain is carried by one single system partner: EWM!!
- Certified welding with EWM welding consumables
- The complete spectrum of EWM welding consumables are produced to EWMs stringent specifications.
- Detailed analysis of every single production charge ensures perfectly consistent quality and welding results

Further to this, (we will take our solid wire as an example), , we control the winding, coating quality, percentage of draw lubricants, feed/glide properties (also over long distances) and metallurgical properties, just to mention a few of the factors effecting quality. All this to ensure the best possible, reproducible process safety.

**TÜVRheinland®**

### ZERTIFIKAT

über die werkseigene Produktionskontrolle

**Nr. 0035 – CPD – C916**

Gemäß der Richtlinie des Rates der Europäischen Gemeinschaften vom 21. Dezember 1988 zur Angleichung der Rechts- und Verwaltungsvorschriften der Mitgliedstaaten über Bauprodukte –89/109/EWG– (Bauproduktenrichtlinie – CPD), geändert durch die Richtlinie des Rates der Europäischen Gemeinschaften vom 22. Juli 1993 – 93/68/EWG –, umgesetzt in Deutschland durch das Bauproduktengesetz – BauPG vom 28. April 1998, wird hiermit bestätigt, dass das Bauprodukt Schweißzusatzwerkstoff

<b>Schweißzusatz</b>	<b>Stabelektroden:</b> EN 1600, EN 14700, EN ISO 2560, EN ISO 3580, <b>Schweißstäbe:</b> EN ISO 636, EN ISO 14343, EN ISO 18273, EN ISO 21952, <b>Drahtelektroden:</b> EN 14700, EN ISO 14341, EN ISO 14343, EN ISO 16834, EN ISO 18273, EN ISO 21952, <b>Fülldrahtelektroden:</b> EN 14700, EN ISO 17632, EN ISO 17633
----------------------	--

**Vertrieb von** Schweißzusätzen der Marke EWM Hightec Welding GmbH

**durch** EWM Hightec Welding GmbH  
Dr. Günter-Henle Str. 8  
D-56271 Mündersbach

in den jeweiligen Fertigungsstätten einer werkseigenen Produktionskontrolle durch den Hersteller unterzogen wurde und dass eine anerkannte Stelle eine Erstinspektion der Werke und der werkseigenen Produktionskontrolle und eine laufende Überwachung, Beurteilung und Anerkennung der werkseigenen Produktionskontrolle durchgeführt hat. Dieses Zertifikat bestätigt, dass alle Vorschriften der Norm

### EN 13479 und Anhang ZA

die die Bescheinigung der Konformität und die Leistungseigenschaften des Produkts betreffen, angewendet wurden. Das Zertifikat wurde erstmals am 11.02.2009 ausgestellt und gilt solange, wie sich die Festlegungen in der oben angeführten harmonisierten Norm nicht ändern und die Herstellbedingungen im Werk oder in der werkseigenen Produktionskontrolle sich nicht wesentlich verändert haben.

With the publication of this handbook all previous editions cease to be valid.

The present manual contains information for users and decision makers. All information regarding chemical composition and mechanical quality values are based on weld metal analyses and can vary in practice due to changed conditions (parent metal, welding parameter, welding position, etc.).

Please refer to our works test certificate for exact information on your product.

EWM reserves the right to change technical data without prior notice.

## Description

- Thick rutile-coated stick electrode
- Excellent ignition and reignition characteristics
- Very homogeneous seam finish.
- Self-removing slag, very low spatter tendency
- Can be welded in any position except vertical-down
- Excellent mechanical properties

## Classification

EN ISO 2560-A	E 42 0 RR 12
EN ISO 2560-B	E 49 13 A
AWS A-5.1	E 6013
EN 499	E 42 0 RR 12
DIN 1913	E 51 22 RR 6

## Approvals

TÜV, DB, CE

## Description

- Basic coated, reduced hydrogen stick electrode.
- Good slag removal characteristics, low spatter tendency
- Excellent for out-of-position welding
- Very good ignition behaviour
- Can be welded in any position except vertical-down
- Creep resistant characteristics
- Excellent mechanical properties

## Description

- Stainless steel, rutile MAG cored wire electrode
- Annealed and layer wound
- Brilliant welding characteristics thanks to higher silicon content
- Can be used for stabilised and non-stabilised Cr-Ni steels.
- For stainless Cr-Ni steels with low C content
- Maximum operating temperature 400 °C

## Classification

## Description

- Low-alloy, basic flux cored wire electrode
- Bright, layer wound.
- Ideal for thick metal sheets and rigidly clamped constructions
- Very strong and highly resistant to cracking
- Hydrogen content < 5 % in the welding material

## Classification

DIN EN ISO 17632-A	T 42 2 B M 1 H5
AWS A5.20	E71T-5M-J
JIS Z3313	YFW-A502B
