

#### Feature:

- ·Output constant voltage
- · Universal AC input:100-265VAC
- · Built-in active PFC function
- · High efficiency up to 90%
- · Protections: Short circuit/Over current/Over loading
- · Cooling by free air convection
- · IP66 design for indoor or outdoor installation
- · Class 1 power unit
- · Three in one dimming function(0/1-10Vdc or PWM signal or resistance)
- · Dimming range: 0-100%
- · Suitable for LED lighting and moving sign applications
- ·Compliance to worldwide safety regulations for lighting
- ·Three years warranty

|        | packing                                                                                                     | 329*279*176mm/10pcs /CTN                                                                              |  |  |  |  |  |  |
|        | 1. All parameters NOT specially mentioned are measured at 230VAC input , rated load and 25°C                |                                                                                                       |  |  |  |  |  |  |
|        | of ambient temperature.                                                                                     |                                                                                                       |  |  |  |  |  |  |
| Notes  | 2. Tolerance: includes set up tolerance, line regulation and load regulation .                              |                                                                                                       |  |  |  |  |  |  |
| Notes  | 3. The power supply is considered as a component that will be operated in combination with final Equipment. |                                                                                                       |  |  |  |  |  |  |
|        | Since EMC performance w                                                                                     | Since EMC performance will be affected by the complete installation, the final equipment manufactures |  |  |  |  |  |  |
|        | must be-qualify EMC Directive on the complete installation again.                                           |                                                                                                       |  |  |  |  |  |  |

### ■ 200W 0-10V dimmable driver Mechanical Specification

### Label

- ※Input Rubber cable H05RN-F 3G 1.0mm², the green/yellow cable connect with (FG), Brown with AC (L), Blue with AC(N)
- \*\*Signal Rubber H05RN-F 2G\*0.75 mm², Blue is (DIM+) ,White is (DIM-)
- $\mbox{\%}$ Output rubber cable H07RN-F 2G\*1.5mm², Red is output (V+) ,Black is output (V-) .

Note: Any other requests we can customized.

## Dimming Operation

- \*\*Built-in 3 in 1 dimming function, IP66 rated .Output luminous can be adjusted through output cable by connecting a resistance or 0/1-10Vdc or 10V PWM signal between DIM+ and DIM-.
- **%Please DO NOT connect "DIM-" to "LED-"**

### Derating Curve

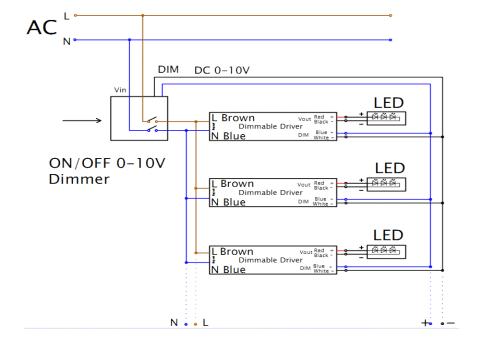

\* To extend their life ,please refer to the Derating Curve and derate according to the temperature

### ■ Connect Drawing

#### Instruction

- 1) This driver should be installed by qualified and professional person;
- 2) Suitable for indoor use and outdoor use; Good ventilation are need;
- 3) Ensure that wiring is correct before test in order to avoid light damage;
- 4) If driver cannot work normally, don't maintain privately; Have any questions, please contact Shengchang;
