**Notes**

1. All parameters if NOT specially mentioned are measured at 120VAC input , rated load and 25°C of ambient temperature.
2. To extend the driver's using life ,please reduce the loading at lower input voltage.
3. Loading should be 60-100%.

**■ Mechanical Specification for KV series 60W Phase/Triac Dimmable driver****■ Label**

※ Input black(L) and white(N) wires to be connected AC, Green wire to be connected ground; output red and black wires to be connected led lighting.

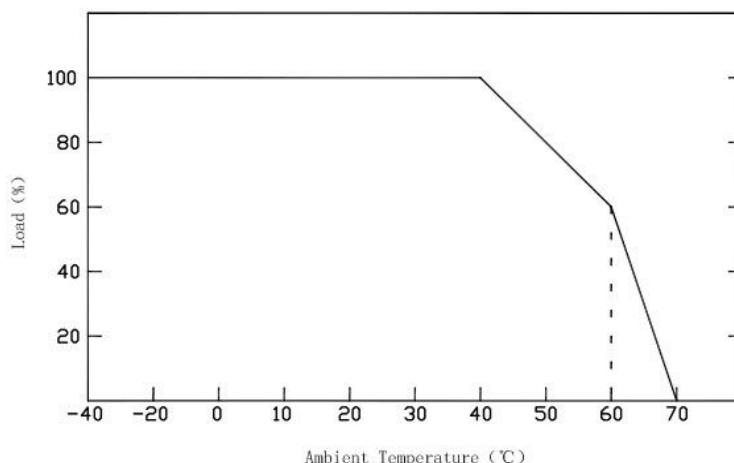

**■ Mechanical Specification for 60W Phase/Triac Dimmable Driver with junction box**

**■ Dimming Operation**

- ※ Output constant current level can be adjusted through input terminal of the AC phase line(L) by connection a phase/triac dimmer.
- ※ Forward phase and Reverse phase, ELV, Triac Dimmers

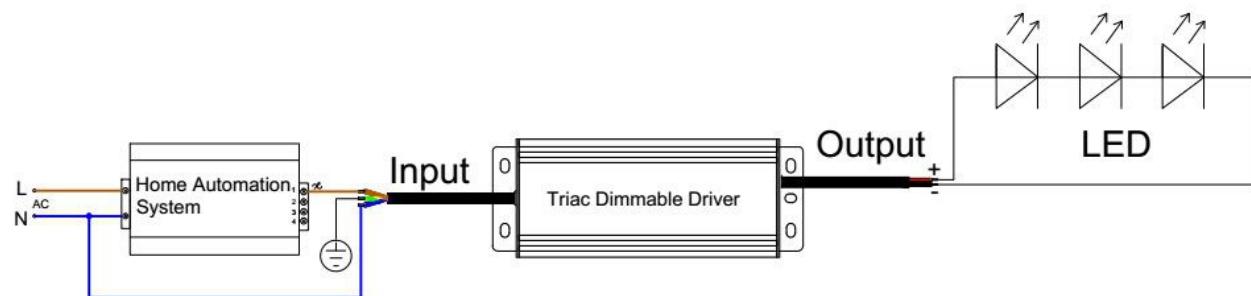

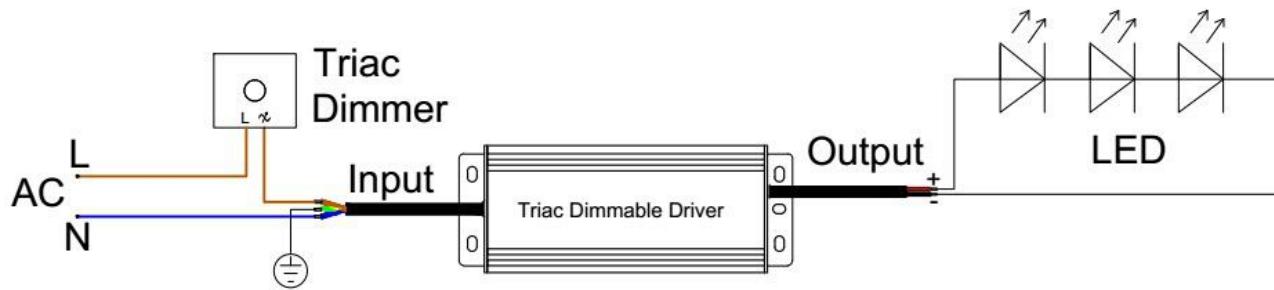

**■ Warning**

- ※ Prevent to reverse polarity; Output polarity: RED “+”; BLACK “-”
- ※ Risk of Electric Shock. When used outdoors, install only on a circuit protected by a Class A GFCI;
- ※ Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician;
- ※ Risk of Electric Shock. Mount the unit at a height greater than 1 foot from the ground surface.

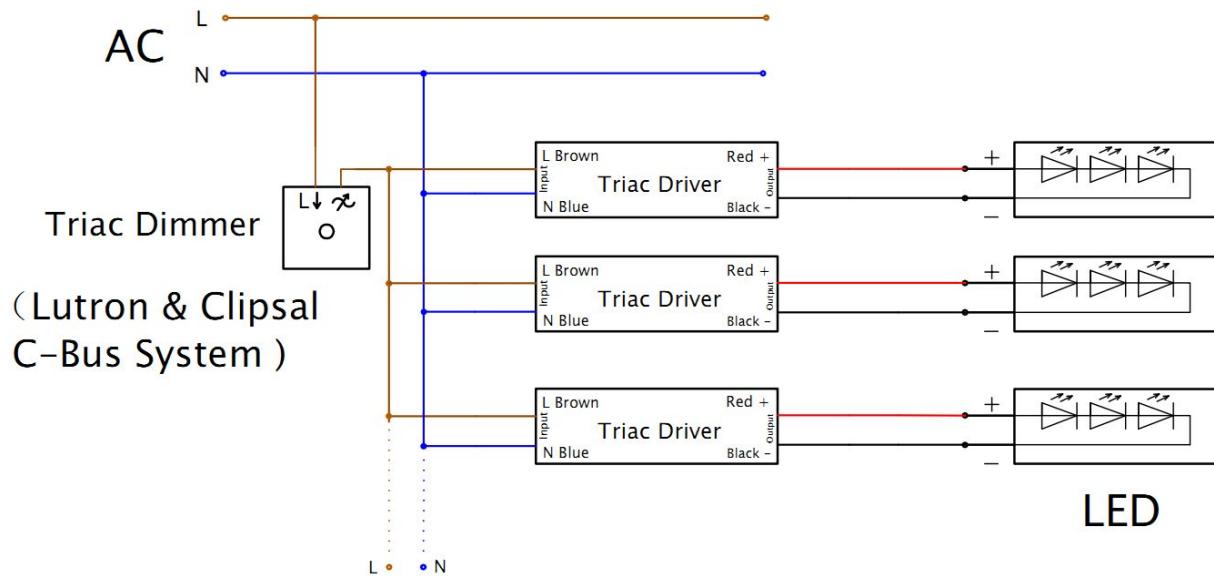

**■ Derating Curve**

※ To extend their life, please refer to the Derating Curve and derate according to the temperature.
